Professional summary

Full-stack developer with 3+ years of experience building and improving production web applications across automotive, hospitality, and customer-service products. Experienced with React, Next.js, Vue, PHP, Laravel, Node.js, and SQL, with a focus on dependable workflows, maintainable changes, and practical delivery in existing systems.

Professional experience

Web Developer - CFS Group

Sydney, Australia | Aug 2024-Present

- Contribute to Virtual Yard, a dealer-management platform used across more than 700 dealership locations, working in production PHP, SQL, jQuery, and Framework7 systems.
- Develop and maintain web and cross-platform mobile workflows for OEM and dealership teams, improving existing features while preserving established operational behaviour.
- Diagnose issues across interface, application, and data layers and deliver tailored changes within a mature codebase.
- Collaborate with internal stakeholders, OEMs, and local dealers to clarify requirements and verify changes against real dealership workflows.

Full Stack Web Developer - OOSHMAN

Sydney, Australia | Jan 2023-Aug 2024

- Built and maintained an operations CMS, ordering workflows, and a driver-tracking application using Laravel, Vue, and MySQL.
- Improved customer registration by integrating Auth0 and Google Sign-In and implemented automated email-marketing workflows.
- Worked across staff, driver, and customer-facing experiences, translating operational requirements into maintainable product changes.

Independent work

Beauty Peaks - Booking and loyalty experience

Next.js | TypeScript | MongoDB

Designed and built a responsive booking experience and loyalty-voucher workflow for a small service business, delivering the product within a limited budget and supporting repeat-customer rewards.
